

Electric Tow Tractor TE10

Electric Tow Tractor T10

INSTRUCTION HANDBOOK

Electric Tow Tractor

WARNING

Do not use the tow tractor before reading and understanding these operating instructions.

NOTE:

- Please check the designation of your present type at the last page of this document as well as on the ID-plate.**
- Keep for future reference.**

Version 03/2014

T E10-SMS-003-EN

FOREWORD

Before operating the tractor, read this ORIGINAL INSTRUCTION HANDBOOK carefully and understand the usage of the tractor completely. Improper operation could create danger.

This handbook describes the usage of different tow tractor. When operating and servicing the tractor, make sure, that it applies to your type.

Chapter 11 describes specialized stipulations and regulations for the American market. Follow these instructions and stipulations if you operate the tractor within the American market!

Keep this handbook for future reference. If this or the warning/ caution labels are damaged or got lost, please contact your local dealer for replacement.

This tractor complies with the requirements according to EN 3691-1; -5 (Industrial trucks- safety requirements and verification, part 1; part 5), EN 12895 (Industrial trucks- electromagnetic compatibility), EN 12053 (Safety of industrial trucks- test methods for measuring noise emissions), EN 1175 (Industrial trucks safety – electrical requirements), assumed the tractor is used according to the described purpose. The noise level for this machine is 62 dB(A) according to EN 12053.

ATTENTION:

- Environmentally hazardous waste, such as batteries, oil and electronics, will have a negative effect on the environment, or health, if handled incorrectly.
- The waste packages should be sorted and put into solid dustbins according to the materials and be collected disposal by local special environment protection bureau. To avoid pollution, it's forbidden to throw away the wastes randomly.
- To avoid leaking during the use of the products, the user should prepare some absorbable materials (scraps of wooden or dry duster cloth) to absorb the leaking oil in time. To avoid second pollution to the environment, the used absorbable materials should be handed into special departments in terms of local authorities.
- Our products are subject to ongoing developments. Because this handbook is only for the purpose of operating /servicing the tow tractor, therefore please have understanding, that there is no guarantee out of particular features out of this handbook.

NOTE: On this manual, the left sign means warning and danger, which can lead to death or serious injury if not followed.

Copyright

The copyright remains with the company, mentioned on the CE- certificate at the end of this document or, if sold within the USA, with the company, mentioned on the company sticker.

1. CORRECT APPLICATION

It is only allowed to use this tractor according to this instruction handbook.

A wrong usage can cause human injuries or can damage equipment.

The operator/ the operating company has to ensure the correct usage and has to ensure, that this tractor is used only by staff, which is trained and authorized to use this tractor.

The tractor has to be used on substantially firm, smooth, prepared, level and adequate surfaces. The tractor is intended to be used for indoor applications with ambient temperatures between +5°C and + 40°C and for light duty applications without crossing permanent obstacles or potholes. Operating on ramps is not allowed. While operating, the load must be placed approximately on the longitudinal centre plane of the tractor.

Lifting or transporting people is forbidden.

The capacity is marked on capacity sticker as well on the Identification plate. The operator has to consider the warnings and safety instructions.

Operating lighting must be minimum 50 Lux.

Modification

No modifications or alterations to this tractor which may affect, for example, capacity, stability or safety requirements of the tractor, shall be made without the prior written approval of the original tractor manufacturer, its authorized representative, or a successor thereof. This includes changes affecting, for example braking, steering, visibility and the addition of removable attachments. When the manufacturer or its successor approve a modification or alteration, they shall also make and approve appropriate changes to capacity plate, decals, tags and operation and maintenance handbooks.

By not observing these instructions, the warranty becomes void.

2. DESCRIPTION OF THE PALLET TRACTOR

a. Overview of the main components

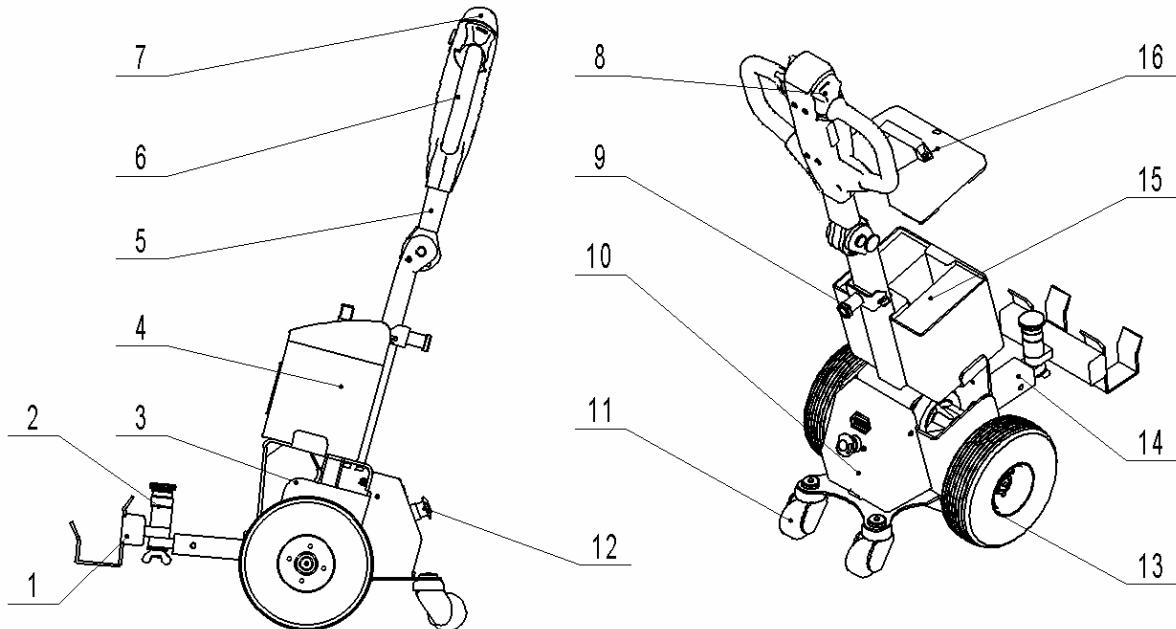

Fig. 1: Overview main components

1) Optional non marking, non inflating tires

c. Description of the safety devices and warning labels (Europe and other, excepting USA)

For the USA –market, the description of the safety and warning labels is mentioned in chapter 11.

- A Crane hook label
 - B Identification plate (ID-plate)
 - D Sticker to read and follow these inst
 - J Never sit on

The tractor is equipped with a combined emergency switch (12) which stops driving-functions and engages the failsafe electromagnetic brake when it is pushed.

By turning the pushed button 90° anti-clockwise, the push- button can be removed and then prevent against unauthorized access. Remove this button, if you not operate the tractor. The tractor is equipped with a safety (belly) button (7) which switches the driving function away from the operator, if the tractor travels towards the operator and the tiller is activated in the tillers operating position. Follow also the instructions given on the decals. Replace the decals if they are damaged or missing.

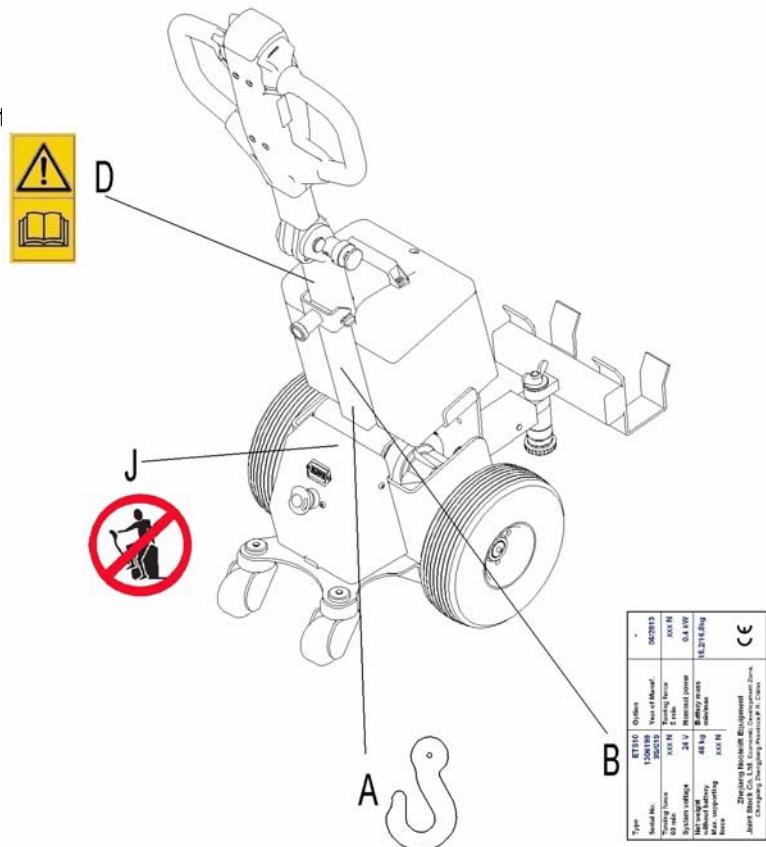

Fig. 3: Safety and warning labels

d. Identification plate

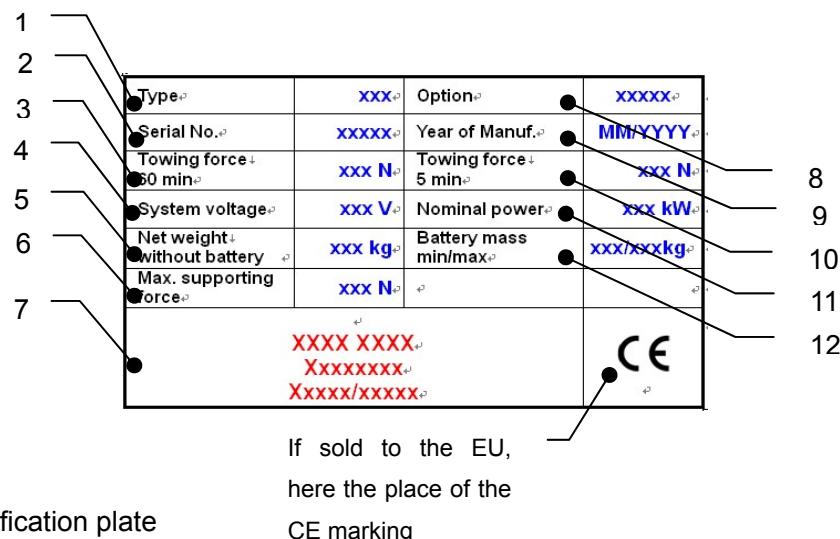

Fig. 4: Identification plate

- | | |
|---|---------------------------------------|
| 1 Designation, type | 7 Name and address of manufacturer |
| 2 Serial number | 8 Option |
| 3 Towing force S2 60 min. | 9 Year of manufacture |
| 4 Supply voltage in V | 10 Towing force S2 5 min. |
| 5 Own mass (self weight) in kg without
battery | 11 Nominal power S2 60 min. in kW |
| 6 Maximum supporting force | 12 Minimum and maximum battery weight |

3. WARNINGS, RESIDUAL RISK AND SAFETY INSTRUCTIONS

DO NOT

- Allow other person than the operator to stand in front of or behind the tractor when it is moving.
- Overload the tractor.
- Put foot in front of the wheels, injury could result.
- Lift people. People could fall down and suffer severe injury.
- Push or pull loads
- Use this tractor on ramps
- Use the tractor with unstable, unbalanced not stable load.
- Use tractor without manufacturer's written consent.
- Lifted loads could become unstable at wind forces. In the case of wind forces do not lift the load if there is any influence to the stability.

Watch difference in floor levels when driving. Load could fall down or the tractor could get uncontrollable.

Keep watching the condition of load. Stop operating the tractor if load becomes unstable.

Brake the tractor and activate the combined emergency switch (12) by pushing when sliding load on or off the tractor. If the tractor has any malfunctions, follow chapter 6.

Practice maintenance work according to regular inspection. This tractor is not designed to be water resistant. Use the tractor under dry condition. Prolonged continuous operation might cause damage of the power pack.

- When operating the tow tractor, the operator has to wear safety shoes.
- The tractor is intended to be used for indoor applications with ambient temperatures between +5°C and + 40°C.
- The operating lighting must be minimum 50 Lux.
- It is not allowed to use the tractor on ramps.
- To prevent unintended sudden movements when not operating the tuck (i.e. from another person, etc.) switch off the tractor when not operating it.

4. COMMISSIONING, TRANSPORTING, DECOMMISSIONING

a. Commissioning

Table 2: Commissioning data

Type	T E10
Commissioning weight [kg]	85
Version/ Lift [mm]	1000

After receiving our new tow tractor or for re-commissioning you have to do following before (firstly) operating the tractor:

- Check if all parts included and not damaged
- Eventually installation and charging the batteries (follow chapter 7)
- Do the work according to the daily inspections as well as functional checks

b. Transportation

For transporting, remove the trailer, fix the tractor safely with dedicated lifting gear according to the following figures.

DURING TRANSPORTATION ON A LORRY OR TRACTOR ALWAYS FASTEN THE TRACTOR SECURELY

Park the tractor securely. Fasten the tractor according to fig. 5 by slinging dedicated lashing belts around both sides of the tractors and fasten the other side at the transporting tractor.

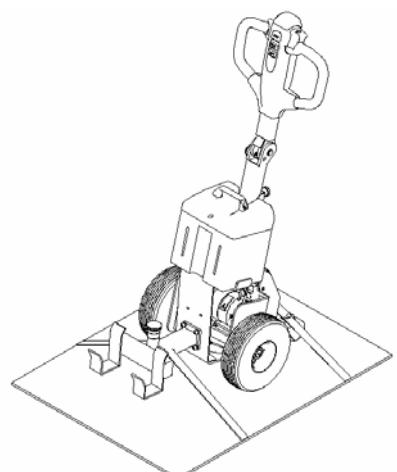

Fig. 5: fixing points

c. Decommissioning

For storage, remove the trailer, grease all in this handbook mentioned greasing points (regular inspection), eventually protect the tractor against corrosion and dust. Remove the batteries and jack the tractor safely, so that there will be no flattening after storage.

For final decommissioning hand the tractor to a designated recycling company. Oil, batteries and electric components must be recycled due to legal regulations.

5. DAILY INSPECTION

This chapter describes pre-shift checks before putting the tractor into operation.

Daily inspection is effective to find the malfunction or fault on this tractor. Check the tractor on the following points before operation.

Remove load from the tractor.

DO NOT USE THE TRACTOR IF ANY MALFUNCTION IS FOUND.

- Check for scratches, deformation or cracks.
- Check the vertical creep of the tractor.
- Check the smooth movement of the wheels.
- Check the function of the emergency brake by activating the combined emergency button.
- Check, the tiller arm- switch braking function
- Check if all bolts and nuts are tightened firmly.
- Visual check if there are any broken hoses or broken electric wires.

6. OPERATING INSTRUCTIONS

BEFORE OPERATING THIS TRACTOR, PLEASE FOLLOW THE WARNINGS AND SAFETY INSTRUCTIONS (CHAPTER 3). AND CONSIDER THE OPERATING OF THE SPECIFIC HOOK SYSTEM.

Make sure, that the load is stable and that the daily inspection of the tow tractor as well as the trailer are carried out.

Insert the key of the combined emergency switch, turn it 90° clockwise and pull the button up.

Press the horn button (17) to activate the audible warning signal.

Hook the specific towing device into the present trailer AND MAKE SURE THAT the trailer is connected accordingly.

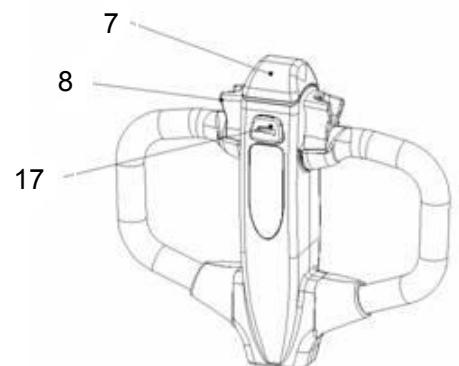

Fig.6: Tiller operating controls

a. Parking

DO NOT PARK THE TRACTOR ON INCLINED SURFACES

The tractor is equipped with an electromagnetic failsafe stopping and parking brake.

Press the combined emergency switch (12), turn the key 90° anti-clockwise and remove the key.

b. Travelling

DO NOT OPERATE THE TRACTOR ON INCLINED SURFACES

After starting the tractor by pulling the combined emergency switch (12), move the tiller to the operating position.

Turn the accelerator button to the desired direction forward 'Fw.' or backwards Bw.'(fig. 7).

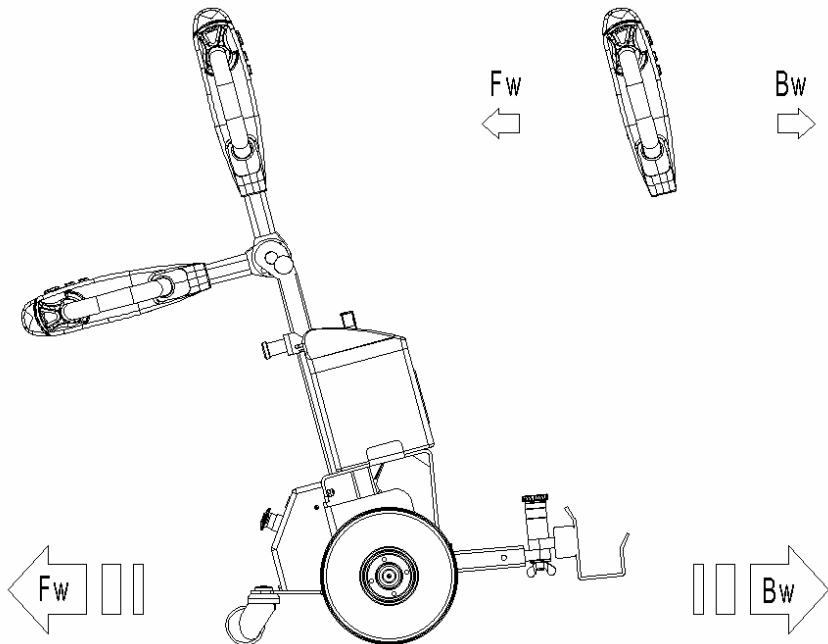

Fig. 7: Operating direction

Control the travelling speed by moving the accelerator button (8) carefully until you reached the desired speed.

If you move the accelerator button back to the neutral position, the controller decelerates the tractor until the tractor stops. If the tractor stopped, the parking brake will be engaged.

Drive carefully the tractor to the destination. Watch the route conditions and adjust the travelling speed with the accelerator- button.

c. Steering

You steer the tractor by moving the tiller to the left or right side.

d. Braking

THE BRAKING PERFORMANCE DEPENDS ON THE TRACK CONDITIONS AND

THE LOAD CONDITIONS OF THE TRACTOR

The braking function can be activated on several ways:

- By moving the accelerator button (8) back to the initial '0' position or by releasing the button, the regenerative braking is activated. The tractor brakes until it stops.
- By moving the accelerator button (8) from one driving direction directly to the opposite direction, the tractor brakes regenerative until it starts travelling into the opposite direction.
- The safety (belly) button (7) prevents the operator from being crushed. If this button is activated, the tractor decelerates and or starts travelling into the backwards direction ('Bw.') for a short distance and stops. Please consider, that this button also operates, if the tractor is not travelling and the tiller is in the operating position.

e. Malfunctions

If there are any malfunctions or the tractor is inoperative, please stop using the tractor and activate the combined emergency button (12) by pushing it. If possible, park the tractor on a safe area and remove the combined locking key from the combined emergency button (12).

Inform immediately the manager and, or call your service. If necessary, tow the truck out of the operating area by using dedicated towing/ lifting equipment.

f. Emergency

In emergencies or in the event of tip over (or off dock), keep safe distance immediately. If possible push the emergency button (12). All electrical functions will be stopped.

7. BATTERY CHARGING AND REPLACEMENT

- Only qualified personnel are allowed to service or charge the batteries. The instructions of this handbook and from the battery- manufacturer must be observed.
- These batteries are maintenance free; re- filling is prohibited.
- Recycling of batteries undergoes national regulations. Please follow these regulations.
- By handling batteries, open fire is prohibited, gases could cause explosion!
- In the area of battery charging neither burning materials nor burning liquids are allowed. Smoking is prohibited and the area must be ventilated.
- Park the tractor securely before starting charging or installing/ changing the batteries
- Before finishing the maintenance work, make sure, that all cables are connected correctly and that there are no disturbing towards other components of the tractor.

As standard batteries, the tractor is equipped with following sealed liquid acid battery- types:

2 pc 24V/ 24Ah

IT IS ONLY ALLOWED TO USE SEALED LIQUID ACID BATTERIES.

THE WEIGHT OF THE BATTERIES HAS AN INFLUENCE TO THE TRACTORS OPERATING BEHAVIOR.

PLEASE CONSIDER THE MAXIMUM OPERATING TEMPERATURE OF THE BATTERIES.

a. Replacement

Park the tractor securely and switch off the tractor with the combined emergency button (12). Pull the battery holder (9) backwards and take out the battery (15) at the same time.

The installation is in the opposite order.

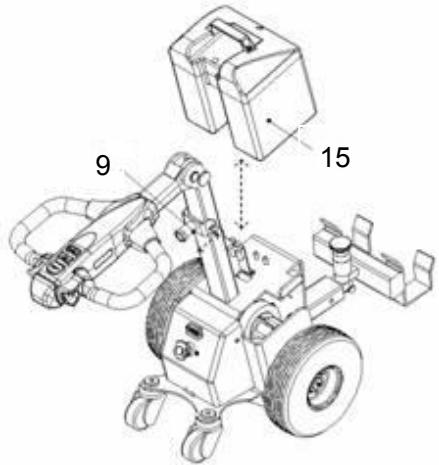

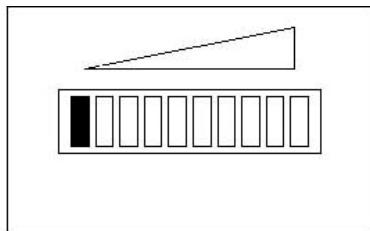

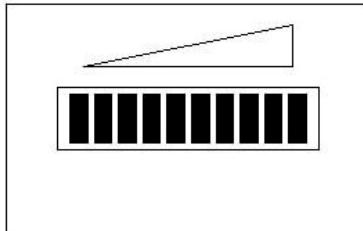

Fig. 8: Battery replacement

b. Battery indicator

Discharge status is indicated by ten red LED segments.

Battery discharged

Battery full charged

Fig.9: Battery discharge indicator

Only when the battery is properly charged, the most right LED lit. As the battery's state-of-charge decreases, successive LEDs light up, only one on at a time.

- The 2nd from left LED flashes, indicating "energy reserve" (70% depth of discharge).
- The 2 most left LEDs alternately flash, indicating "empty" (80% depth of discharge).

c. Charging

- It is only allowed to use the supplied charger for charging the installed batteries!
- Before using the charger, please fully understand the instructions of the charger instructions.
- Always follow these instructions!
- The room, where you are charging must be ventilated.
- The exact charge status can be only checked from the discharge indicator. To control the status, the charging must be interrupted and the tractor must be started.

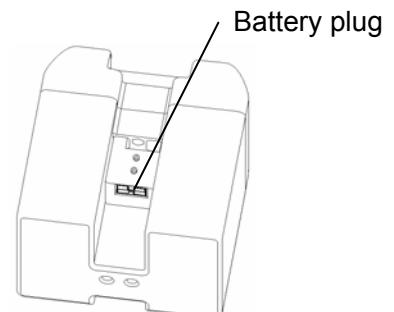

Fig. 10: Battery charging

Park the tractor at a dedicated secured area with a dedicated power supply.

Remove the trailer from the tractor.

Switch the tractor off and take out the battery, then connect the external charger to the battery plug.

The charger starts charging the battery.

Disconnect the battery plug after the charger finished charging.

The used external charger has following electrical data:

Rated input: 100 – 240 V AC, 50/60 Hz, 300W

Rated output: 24V/ 3A

When charging is finished, disconnect the charger from the socket and place it in the designated pocket.

8. REGULAR MAINTENANCE

- Only qualified and trained personnel are allowed to do maintenance on this tractor.
- Before maintaining, remove the trailer from the tractor.
- If you need to lift the tractor, follow chapter 4b by using designated lashing or jacking equipment.
- Please pay attention by maintain the tiller arm. The gas pressure spring is pre-loaded by compression, carelessness can cause injury.
- Use approved and from your dealer released original spare parts.
- If you need to change the wheels, please follow the instructions above. The castors must be round and they should have no abnormal abrasion.

Check the items emphasized maintenance checklist.

a. Maintenance checklist

Table 3: Maintenance checklist

		Interval(Month)			
		1	3	6	12
Mechanical system					
7	Check the chassis for deformation and cracks			•	
8	Check if all screws are fixed		•		
10	Check the gearbox for noise and leakage		•		
11	Inspect the wheels for deformation and damages		•		
12	Inspect and lubricate the steering bearing				•
13	Inspect and lubricate the pivot points		•		
14	Check the air pressure for the wheels and if necessary refill air	•			
Electrical system					
15	Inspect the electric wiring for damage		•		
16	Check the electric connections and terminals		•		
17	Test the Emergency switch function		•		
18	Check the electric drive motor for noise and damages		•		
19	Test the display		•		
20	Check, if correct fuses are used		•		

21	Test the warning signal		•		
22	Check the contactor(s)		•		
23	Check the frame leakage (insulation test)		•		
24	Check function and mechanical wear of the accelerator		•		
25	Check the electrical system of the drive motor		•		
Braking system					
26	Check brake performance, if necessary replace the brake disc or adjust the air gap		•		
Battery					
27	Check the battery voltage		•		
28	Clean and grease the terminals and check for corrosion and damage		•		
29	Check the battery housing for damages		•		
Charger					
30	Check the main power cable for damages		•		
31	Check the start-up protection during charging		•		
Function					
32	Check the horn function	•			
33	Check the air gap of the electromagnetic brake	•			
34	Test the emergency braking	•			
35	Test the reverse and regenerative braking	•			
36	Test the safety (belly) button function	•			
37	Check the steering function	•			
39	Check the tiller arm switch function	•			
General					
40	Check if all decals are legible and complete	•			
41	Inspect the castors, adjust the height or replace these if worn out.		•		
42	Carry out a test run	•			

b. Lubricating points

Lubricate the marked points according to the maintenance checklist. The required grease specification is: DIN 51825, standard grease.

1. Casters
2. Driving wheel
3. Height adjustment assembly
4. Tiller fixing bearing

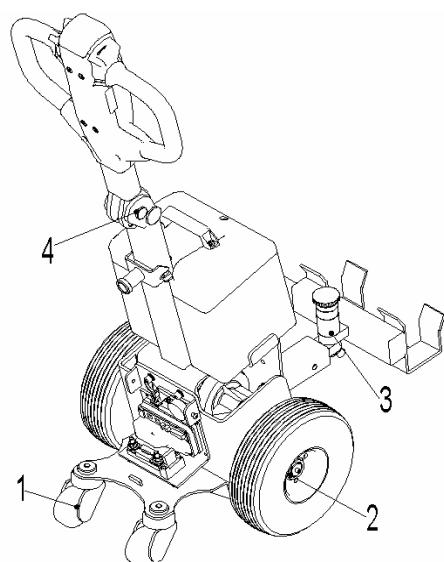

Fig. 11: Lubricating points

c. Checking electrical fuses

Remove the main cover. The fuses are located according to fig. 12.

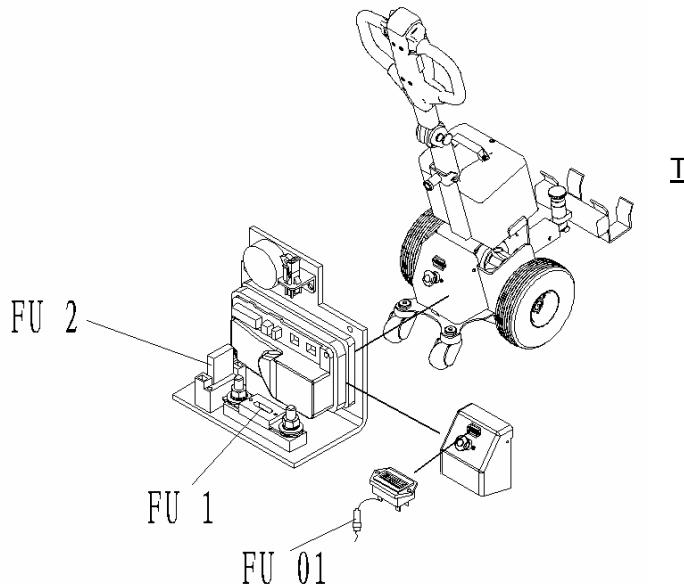

Table 4: Size fuses

	Rate
FU01	0.5A
FU 1	30A
FU 2	10A

Fig. 12: Location fuses

d. Pneumatic tires

- Too high air pressure can cause bursting tires. Never inflate the tires with a higher pressure than allowed.

Check the air pressure of the pneumatic tires regularly with an air pressure gauge. Refill air to the correct value if necessary.

The max. air pressure is : 1.5~2 bar

9. TROUBLE SHOOTING

- If the tractor has malfunctions follow the instructions, mentioned under chapter 6.

Table 5: Trouble shooting

TROUBLE	CAUSE	REPAIR
Tractor not starts operating	Battery is charging	Charge the battery completely and then remove the main power plug from the electrical socket.
	Battery not connected	Connect the battery correctly
	Fuse faulty	Check and eventually replace fuses
	Low battery	Charge the battery
	Combined emergency switch is activated	De-activate the combined emergency switch by insert and pull the knob.
	Tiller in the operating position	Move the tiller firstly to the braking position.

If the tractor has malfunctions and can't be operated out of the working zone, jack the tractor up and go with a load handler under the tractor and safe the tractor securely. Then move tractor out of the aisle.

10. WIRING/ CIRCUIT DIAGRAM

a. Electrical circuit diagram

11. SPECIALIZED STIPULATIONS FOR THE US- AMERICAN MARKET

The content in this chapter is specialized for the US-American market.

a. Foreword/ Compliance

Operating this tractor requires knowledge which can be acquired from this instruction handbook. This handbook must be kept available throughout the entire period of use of the industrial tractor.

**IT IS LAW; YOU MUST BE TRAINED AND CERTIFIED TO OPERATE THIS TRACTOR!
READ AND OBEY ALL WARNINGS AND INSTRUCTIONS IN THIS MANUAL AND ON THE TRACTOR!**

Only properly trained operators are allowed to operate a powered industrial tractor. Your employer must train you and certify, that you are qualified to operate this tractor (required by OSHA § 1910.178). The training must satisfy OSHA requirements and as minimum the topics mentioned in this handbook. Depending on the context in this operating manual, the user can refer to several people, including the owner of the tractor, anyone who leases or borrows this tractor, and the operator as defined in ASME B56.1. Please pay attention to the section in ASME B56.1 concerning the operator. In this standard, it is defined that the safe operation is the responsibility of the operator (ASME B56.1-2003, Part II, section 5.1.1). You and others can be seriously injured or even killed if you don't use this tractor correctly. Before operating your tractor, inspect your tractor and ensure that it is in correct working order. This tractor was designed and built to current industry and government standards. For more information see following:

- ASME B56.1 (American Society of Mechanical Engineers)
- OSHA §1910.178 (Occupational Safety and Health Act)
- UL 583 (Underwriters Laboratory)
- ANSI Z535.4 (American National Standards Institute)

⚠ DANGER This sign indicates hazard situations, if not avoided, will result in serious injury or death. The instructions or precautions to this message must be observed to avoid the potential risk of injury or death.

⚠ WARNING If not followed, warning indicates hazard situations which may lead to moderate injury. The instructions or precautions to this message must be observed to avoid the potential risk of injury or death.

⚠ CAUTION If not followed, caution indicated situations which may lead to minor injury. Instructions or precautions must be observed to avoid minor injury.

b. Description warning labels (only US- market)

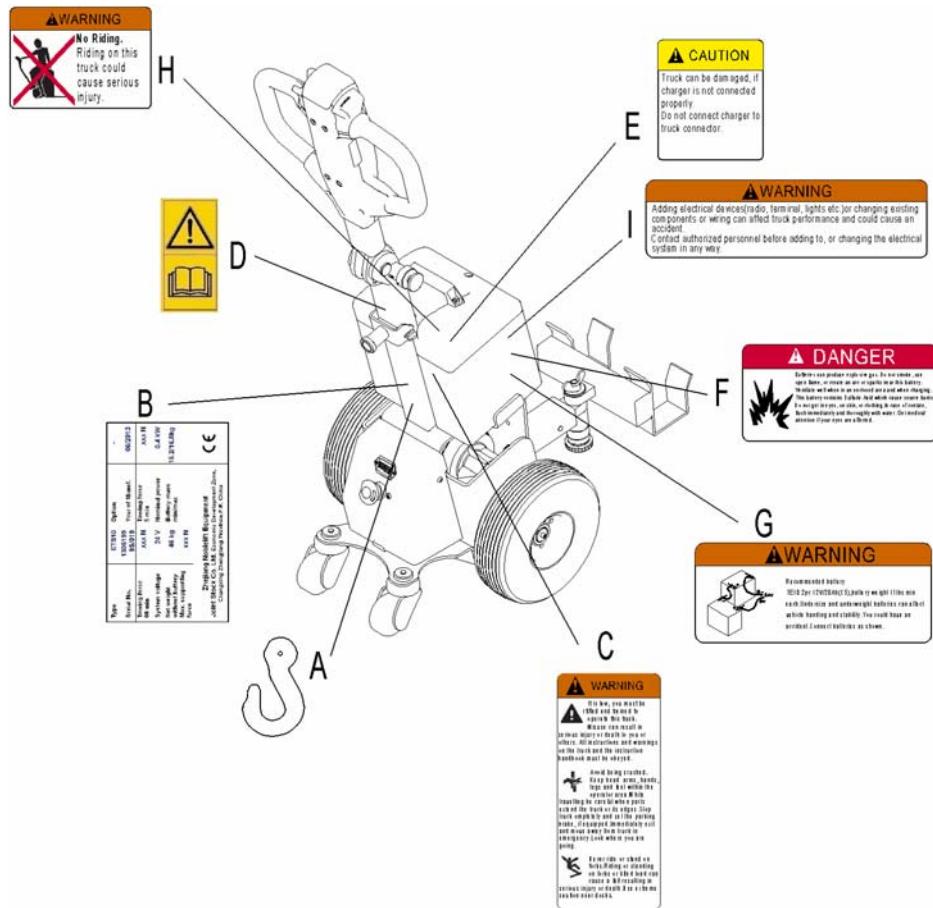

Fig. 14: Warning labels and safety devices (only USA)

- | | | | |
|---|--|---|---------------------------------|
| A | Crane hook label | F | Sign danger battery |
| B | Identification plate (ID-plate) | G | Sign warning battery size |
| C | Sign warning stay clear stop tractor | H | Never sit on |
| D | Sticker to read and follow these instruction | I | Sign warning electrical devices |
| E | Sign Caution charger | | |

The tractor is equipped with a combined emergency switch (12) which stops driving- function and engages the failsafe electromagnetic brake when it is pushed. The function is described in chapter 2c. Follow the instructions given on the decals. Replace the decals if they are damaged or missing.

Sign warning stay clear stop tractor (C)

Sign read and follow this instruction (D)

12. DECLARATION OF CONFORMITY (valid, if sold within the EU)

[GB] CE Declaration of Conformity

The signatory hereby declares that the specified machine conforms to the EU Directive 2006/42/EC (Machine Directive) and 2004/108/EEC (Electro-Magnetic Compatibility, EMC) including their amendments as translated into national legislation of the member countries. The signatory is individually authorized to compile the technical documents.

[D] EG-KONFORMITÄTSERKLÄRUNG

Der Unterzeichner bescheinigt hiermit, dass die im Einzelnen bezeichnete Maschine den Europäischen Richtlinien 2006/42/EG (Maschinenrichtlinie) und 2004/108/EWG (Elektromagnetische Verträglichkeit - EMV) einschließlich deren Änderungen sowie dem entsprechenden Rechtserlass zur Umsetzung der Richtlinien in nationales Recht entspricht. Der Unterzeichner ist bevollmächtigt, die technischen Unterlagen zusammenzustellen.

[E] DECLARACIÓN DE CONFORMIDAD CE

El signatario certifica por medio de la presente que la máquina especificada cumple con las Normas Europeas 2006/42/CE (Normativa para maquinarias) y 2004/108/CE (Compatibilidad electromagnética), incluyendo sus respectivas modificaciones, así como con el decreto-ley para la adaptación de las normas al derecho nacional. El signatario dispone de una autorización individual que le permite compilar la documentación técnica.

[F] DECLARATION DE CONFORMITE CE

Par la présente déclaration, les soussignés certifient que le machines spécifié ci-dessus est conforme à la loi et aux directives européennes 2006/42/CE (directive sur les machines) et 2004/108/CEE (compatibilité électromagnétique - CEM), y compris aux modifications qui y sont apportées et à l'arrêté autorisant sa transposition en droit national. Chaque signataire est habilité à établir individuellement la documentation technique.

[NL] EG-CONFORMITEITSVERKLARING

Ondergetekenden verklaren hierbij dat - volgens de nationale wetgeving van de Lidstaten - de hierboven vermelde opgegeven machina beantwoordt aan de bepalingen qua veiligheid bij machines (EG richtlijn 2006/42/EC) en electro-magnetische compatibiliteit (EG richtlijn 2004/108/EEC).

Ondergetekenden zijn ieder individueel gemachtigd het technisch dossier samen te stellen.

[P] DECLARAÇÃO DE CONFORMIDADE CE

Pela presente, os signatários certificam que o máquina especificado está conforme às Directivas Europeias 2006/42/CE („Máquinas“) e 2004/108/CEE („Inocuidade Electromagnética - IEM“), incluindo as alterações das mesmas e o respetivo decreto-lei para a transposição em lei nacional. Cada um dos signatários está autorizado a proceder à elaboração da documentação técnica.

[I] DICHIARAZIONE DI CONFORMITÀ CE

I sottoscritti dichiarano che il veicolo per trasporti interni a macchina specificato soddisfa le Direttive Europee 2006/42/EC (Direttiva Macchine) e 2004/108/EEC (Compatibilità elettromagnetica - EMV) comprese le relative modifiche, come pure il rispettivo decreto legislativo per la conversione delle direttive in diritto nazionale. I sottoscritti sono singolarmente autorizzati alla creazione della documentazione tecnica.

[BG] ЕВРОПЕЙСКА ОБЩНОСТ - ДЕКЛАРАЦИЯ ЗА СЪОТВЕТСТВИЕ

Подписаните удостоверяват с настоящето, че подробно описаното машина средство отговаря на европейския норматив 2006/42/EG (норматив за машини) и на 2004/108/EG (електро-магнитична съвместимост), включително с техните промени, както и на съответния указ за прилагане на нормативите в националното право. Подписаните при това са упълномощенни поотделно да съставят техническата документация.

[CZ] EG - PROHLÁŠENÍ O SHODĚ

Níže podepsaný tímto potvrzuje, že podrobný popis uvedené stroje odpovídá Evropským směrnicím 2006/42/EC (směrnice pro stroje) a 2004/108/EEC (elektromagnetická interference - EMV) včetně jejich pozdějších úprav, jakož i příslušném právním výnosům pro uplatnění příslušné směrnice v rámci národního práva. Každý z podepsaných jsou jednotlivě zplnomocněni k vytvoření technických podkladů.

[DK] EF-OVERENSSTEMMELSESERKLÆRING

Undertegnede atesterer hermed, at det specificerede maskine stemmer overens med de Europæiske Direktiver 2006/42/EU (maskindirektiv) og 2004/108/EØF (elektromagnetisk kompatibilitet - EMC) samt med den modsvarende lovvedtagelse til implementering af direktiver i den nationale lovgivning. De undertegnede er her for sig beføjet til at sammenstille de tekniske dokumenter.

[EST] EL vastavusavaldis

Allkirjutanud tööendavad käesolevaga, et üksikasjaliselt kirjeldatud täpsustatud masin vastab Euroopa direktiividele 2006/42/EÜ (Direktiiv masinate kohta) ja 2004/108/EMÜ (Elektromagnetiline sobivus - EMS) kaasa arvatud nende muudatused ja nendele vastavatele õigusmäärustele direktiivide muutmiseks siseriiklikuks õiguseks. Iga allakirjutanu üksikult on volitatud koostama tehnilist dokumentatsiooni.

[FIN] EU-YHDENMUKAISUUSSELOSTUS

Allekirjoittaneet todistavat täten, että kukaan erikseen mainittu omalla voimanlähteellä varustettu tehdaskone vastaa EU-direktiivien 2006/42/EC (koneenrakennusdirektiivi) ja 2004/108/EEC (sähkömagneettinen yhteensopivuus – EMC) määräyksiä sekä niiden muutoksia ja niiden kansalliseen lainsäädäntöön soveltamista koskevaa oikeussääntöä. Jokaisella allekirjoittaneista on oikeus itsenäisesti laatia asiaankuuluvia teknisiä asiakirjoja.

[GR] ΔΗΛΩΣΗ ΣΥΜΜΟΡΦΩΣΗΣ ΕΟΚ

Οι υπογράφοντες βεβαιώνουν διά της παρούσης ότι το συγκεκριμένο μηχάνημα συμμορφώνεται προς την Κοινωνική Οδηγία 2006/42/EK («Μηχανήματα») και 2004/108/EOK (Ηλεκτρομαγνητικής Συμβατότητας, ΗΜΣ), καθώς και οι τροποποιήσεις τους, όπως μεταφράστηκε στην εθνική νομοθεσία των χωρών μελών. Οι υπογράφοντες είναι σε κάθε περίπτωση εξουσιοδοτημένοι ατομικά να καταρτίσουν τα τεχνικά έγγραφα.

[H] EU KONFORMITÁSI NYILATKOZAT

Alulírottak ezennel igazolják, hogy a részletesen leírt a megadott gép megfelel a 2006/42/EC (Gép-Irányelv) és a 2004/108/EEC (Elektromágneses összeférhetőség - EMV) Európai Irányelvöknek, beleértve azok módosításait, valamint az irányelvek nemzeti jogba történő általánosítására vonatkozó jogi rendelkezést. Továbbá az alulírottak mindegyike rendelkezik meghatalmazással arra nézve, hogy összeállíthatja a műszaki dokumentációt.

[LT] ES atitikimo deklaracija

Žemaiu pasiraše asmenys patvirtina, kad atskirai aprašytas nurodyta mašina atitinka Europos Sajungos direktyvas 2006/42/EB (Mašinų direktyva) ir 2004/108/EEB (Elektromagnetinis suderinamumas – EMS) įskaitant jų pakeitimus, o taip pat ir atitinkamą teisės aktą dėl direktyvų įgyvendinimo nacionalinėje teisėje. Kiekvienas iš pasirašiusių asmenų turi teisę ruošti techninę dokumentaciją.

[LV] ES atbilstības deklārācija

Ar zemāk redzamajiem parakstiem tiek apliecināts, ka norādīts mašīna atbilst Eiropas Savienības normatīvām 2006/42/EG (Mašīnu normatīvas) un 2004/108/EWG (Elektromagnētiskā atbilstība – EMV), ieskaitot to izmaiņas, kā arī atbilstošos tiesiskos rīkojumus normatīvu pielāgošanai nacionālajai likumdošanai. Parakstu īpašnieki ir atsevišķi pilnvaroti sastādīt tehniskās dokumentācijas.

[NL] EU-KONFORMITETSERKLÆRING

Undertegnede bekrefter hermed at de enkelte betegnede maskin med kraftdrift tilsvarer de europeiske retningslinjene 2006/42/EC (maskinretningslinje)

og 2004/108/EEC (elektromagnetisk fordraglighet - EMV) inklusiv disses endringer og den tilsvarende rettsforordning til omsetning av nasjonal rett. Hver undertegnede er fullmektig til å sette sammen de tekniske dokumentene.

[PL] DEKLARACJA ZGODNOŚCI WE

Niżej podpisani deklarują, że poniżej opisana maszyna spełnia wymagania określone w dyrektywach Europejskich 2006/42/EC (Dyrektywa Maszynowa) i 2004/108/EEC (Kompatybilności elektromagnetycznej - EMC) wraz z ich późniejszymi zmianami oraz odpowiednimi rozporządzeniami mającymi na celu przeniesienie tych dyrektyw do prawa krajów członkowskich. Sygnatariusz jest indywidualnie upoważniony do zestawiania dokumentacji technicznej.

[RO] DECLARAȚIE DE CONFORMITATE EC

Subsemnatii adeveresc prin prezenta că vehiculul de specificat mașină descriș individual corespunde directivelor europene 2006/42/CE (Directiva privind mașinile) și 2004/108/CEE (Compatibilitatea electromagnetică - CEM) inclusiv modificărilor lor precum și actului legislativ corespunzător prezentului. Subsemnatii sunt fiecare în parte împuterniciți să întocmească documentația tehnică.

[RUS] Декларация соответствия стандартам EC

Настоящим лицом, подписавшим документ, удостоверяют, что машина с указанной спецификацией соответствует европейским стандартам 2006/42/EG (Транспортная директива) и 2004/108/EWG (Электромагнитная совместимость - EMC), включая изменения в них, а также соответствующим национальным стандартам и нормам. Каждое по отдельности лицо, подписавшее документ, имеет полномочия для составления технической документации.

[SK] EG-KONFORMITETSFÖRKLARING

Undertecknarna intygar härmed att det i detalj betecknade maskin uppfyller de Europeiska direktiven 2006/42/EG (Maskindirektiv) och 2004/108/EEG (Elektromagnetisk tålighet - EMV), inklusive ändringarna i detta och den motsvarande rättsförordningen för att omsätta direktiven i nationell rätt. Undertecknarna har var för sig fullmakt att sammanställa den tekniska dokumentationen.

[SK] vyhlášenie o zhode

Dolu podpísaní týmto potvrzujeme, že podrobný popis uvedené stroje Zodpovedá Európskym smernicam 2006/42/EC (ernica pre stroje) a 2004/108/EWG (elektromagnetická tolerancia – EMV) vrátane jeho neskorších úprav, rovnako zodpovedá aj príslušným právnym nariadeniam na uplatnenie smerníc v rámci národného práva. Každý z podpísaných je jednotivo splnomocnený na vytvorenie technických podkladov.

[SLO] EU IZJAVA O SKLADNOSTI

Podpisani s tem potrjujemo, da posamično označeno določeno stroj vozilo odgovarja Evropski direktivi 2006/42/EC (Direktiva o strojih) in 2004/108/EEC (Elektromagnetna skladnost - EMV) vključno z njihovimi spremembami ter ustrezno pravno uredbo o prevzemu smernic v nacionalno pravo. Podpisniki so vsakokrat posamezno pooblaščeni za izdajanje tehnične dokumentacije.

[TR] AB Uygunluk Açıklaması

İmza sahibi şahıslar, ayrıntıları belirtilen makine aracının, 2006/42/EC (Makine Yönetgesi) ve 2004/108/EEC (Elektromanyetik Uyumluluk – EMC) no'lu Avrupa Yönetgelerine ve bunların değişiklik sonucu oluşan metinlerine ve yönetgelerin milli hukuk hükümlerine dönüştürülmesine dair ilgili hukuk kararnamesine uygun olduğunu tasdik ederler. İmza sahibi şahıslar teknik dosyaları bir araya getirmek için münferiden vekil tayin edildi.

INSTRUCTION HANDBOOK

Electric Tow Tractor

WARNING

Do not use the tow tractor before reading and understanding these operating instructions.

NOTE:

- Please check the designation of your present type at the last page of this document as well as on the ID-plate.
- Keep for future reference.

FOREWORD

Before operating the truck, read this ORIGINAL INSTRUCTION HANDBOOK carefully and understand the usage of the truck completely. Improper operation could create danger.

This handbook describes the usage of different electric pallet trucks. When operating and servicing the truck, make sure, that it applies to your type.

**! Chapter 11 describes specialized stipulations and regulations for the American market.
Follow these instructions and stipulations if you operate the truck within the American market!**

Keep this handbook for future reference. If this or the warning/ caution labels are damaged or got lost, please contact your local dealer for replacement.

This truck complies with the requirements according to EN 3691-1; -5 (Industrial trucks- safety requirements and verification, part 1; part 5), EN 12895 (Industrial trucks- electromagnetic compatibility), EN 12053 (Safety of industrial trucks- test methods for measuring noise emissions), EN 1175 (Industrial truck safety – electrical requirements), assumed the truck is used according to the described purpose.

ATTENTION:

- Environmentally hazardous waste, such as batteries, oil and electronics, will have a negative effect on the environment, or health, if handled incorrectly.
- The waste packages should be sorted and put into solid dustbins according to the materials and be collected disposal by local special environment protection bureau. To avoid pollution, it's forbidden to throw away the wastes randomly.
- To avoid leaking during the use of the products, the user should prepare some absorbable materials (scraps of wooden or dry duster cloth) to absorb the leaking oil in time. To avoid second pollution to the environment, the used absorbable materials should be handed in to special departments in terms of local authorities.
- Our products are subject to ongoing developments. Because this handbook is only for the purpose of operating /servicing the pallet truck, therefore please have understanding, that there is no guarantee out of particular features out of this handbook.

! NOTE: On this manual, the left sign means warning and danger, which can lead to death or serious injury if not followed.

1. General Introduction of Electric Tow Tractor

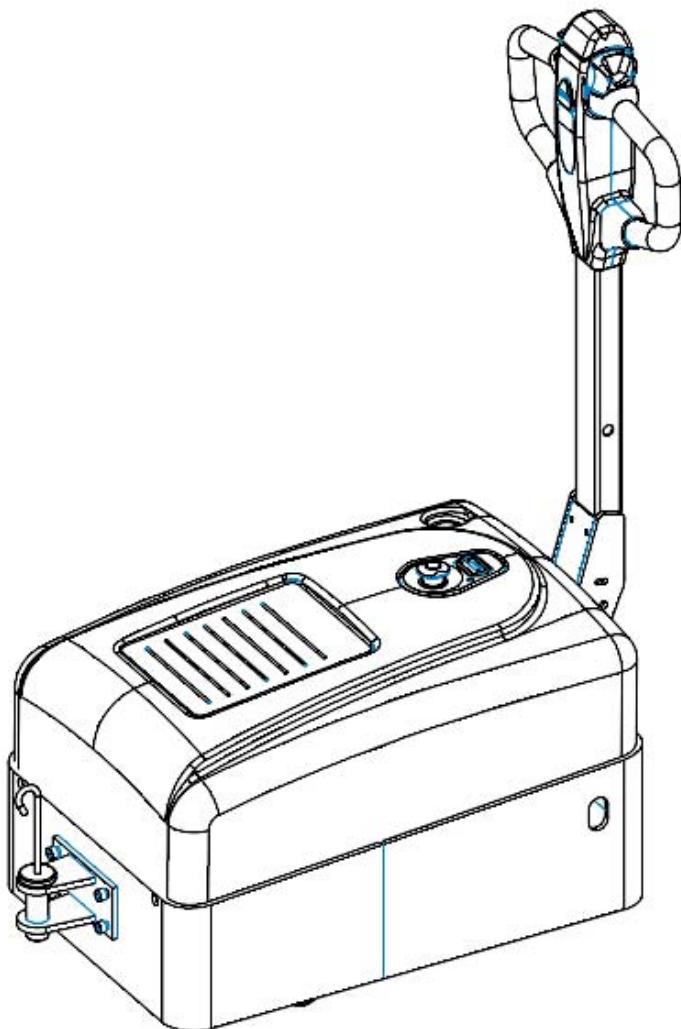

a. Description of Use Range

T10 is a three-wheeled electric tow tractor operated by handle, using to handle goods with coupling device of trailer on the indoor flat ground.

The tractor is powerful, using maintenance-free AC traction motor, which is economical and practical.

Built-in charger, charged on the socket, which is easy and convenient.

Detailed description of allowable tractor load shows on its nameplate.

b. Overall Dimension and Technical Performance Parameter of Electric Tow Tractor

b-1.Overall Dimension see Fig.1-1

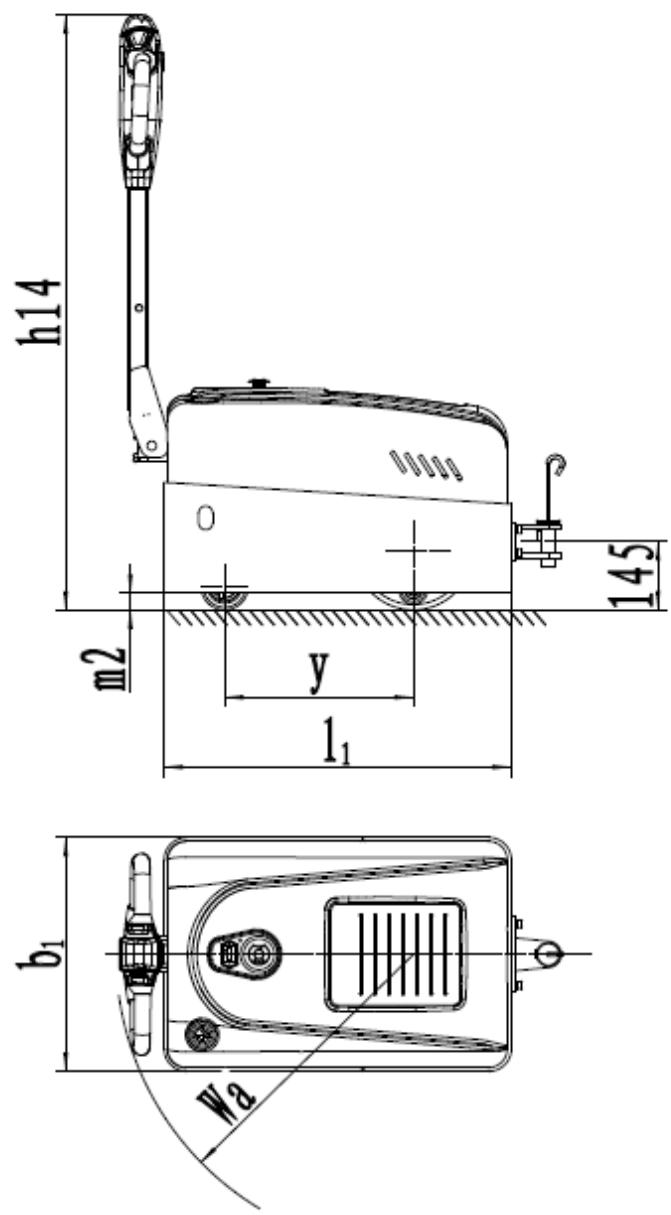

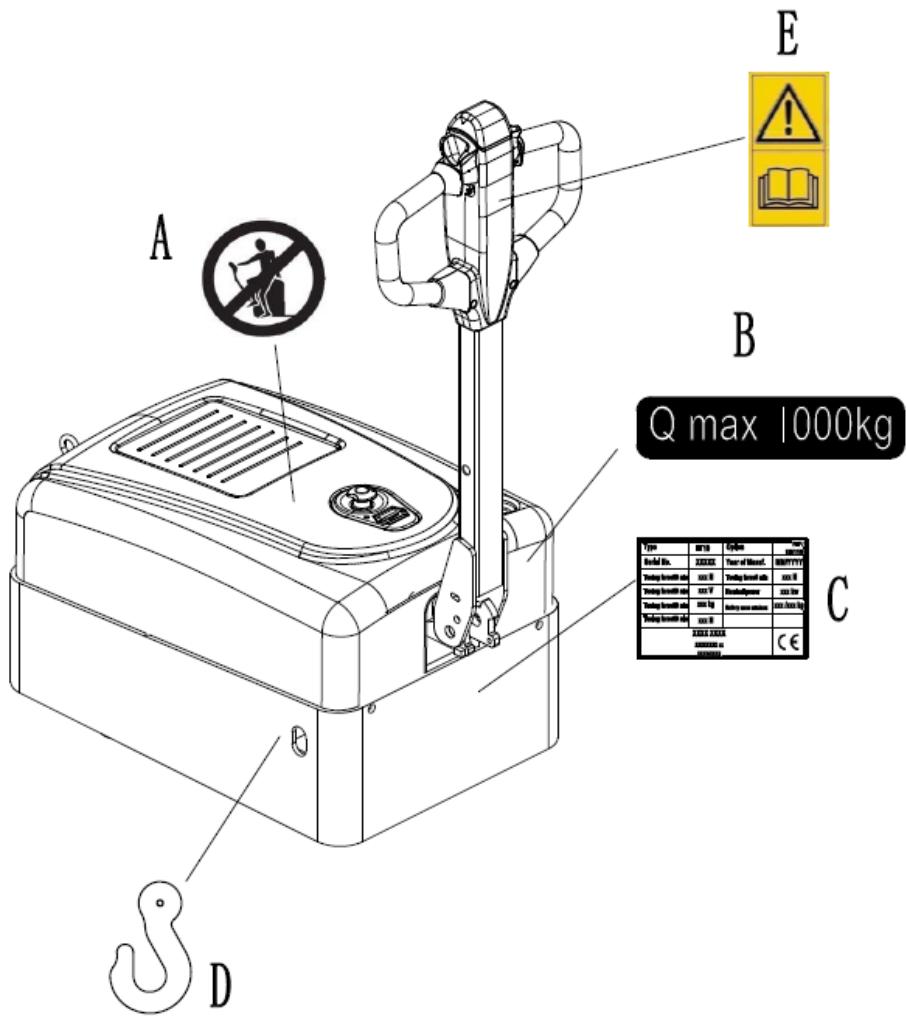

Fig.1-1 Overall dimension

T10 parameter list

Feature	1.2 Type		T10
	1.3 Power plant		Electric、AC
	1.4 Operation mode		Pedestrian
	1.5 Rated load	Q (Kg)	1000
	1.7 Traction force	F (N)	200
	1.9 Wheelbase	Y (mm)	440
Weight	2.1 Self weight	kg	180
	2.3 Front/rear wheel load unladen	kg	70/110
Wheel chassis	3.1 Tire material		Polyurethane
	3.2 Load wheel size	(mm)	100x40
	3.3 Driving wheel size	(mm)	252x88
	3.5 Quantity (x=driving)		1x/2
	3.6 Track width (rear)	(mm)	410
	3.7 Track width (front)	(mm)	300
Dimension	4.9 Handle height in neutral position	h14 (mm)	1235
	4.19 Overall length	l1 (mm)	736
	4.21 Overall width	b1 (mm)	496
	4.32 Ground clearance	M2 (mm)	35
	4.35 Turning radius	Wa (mm)	598
Performance	5.1 Travel speed laden/unladen	km/h	4.7/4.9
	5.5 Traction laden/unladen	N	420/-
	5.6 Maximum traction laden/unladen	N	500/-
	5.10 Braking		Electromagnetic
Motor	6.1 Drive motor	kW	0.9(AC)
	6.3 Battery acc. to DIN 43531/ 35/ 36 A, B, C, no		No
	6.4 Battery voltage、capacity	V/Ah	24/85
	6.5 Battery weight	kg	50
Other	8.1 Type of drive control		MOSFET control AC
	8.4 Sound level at driver's ears	dB(A)	<70

b-2. Warning Label Position and Nameplate

A No riding label

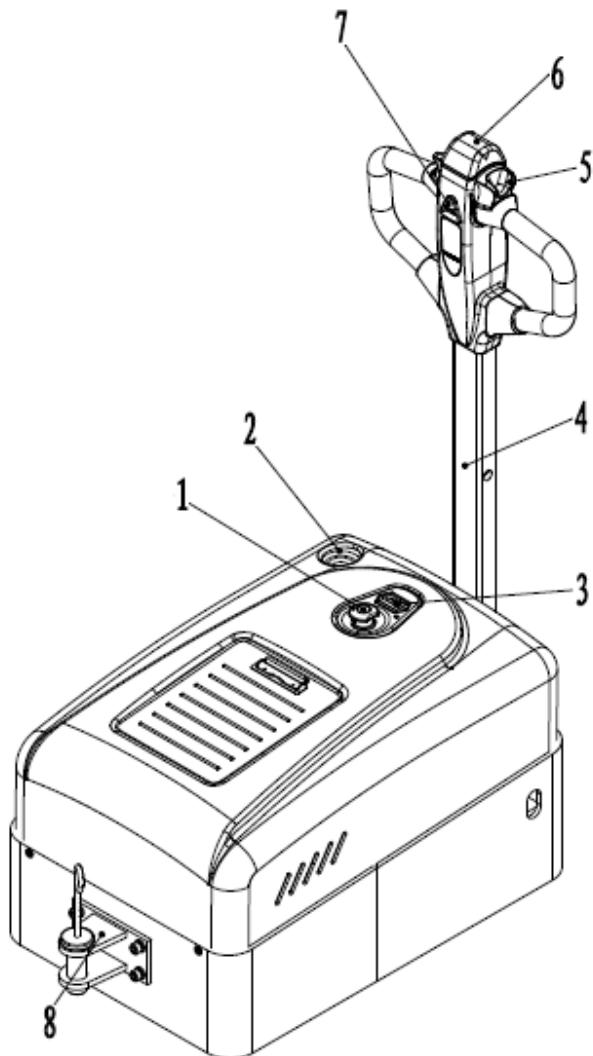

B Trailer load

C Nameplate

D Hook label

E Sticker to read and follow these instructions

c.Main Parts and Structure of Electric Tow Tractor

No.	Designation	No.	Designation
1	Accelerator switch of handle	6	Driving wheel
2 Handle	lever	7	Coulombmeter
3 E	mergency stop switch	8	Coupling device
4 Charging	plug		
5 Pl	astic cover		

2.Transport and First Trial Run

a.Crane Handling

Only use hoisting equipments with sufficient load capacity.

Hook holes of tractor frame should be used when handling tractor with crane.

 The crane must be applied at fixed point, ensuring the tractor will not be splipped down, and do not connect with the tractor when hoisting.

b.Fixing Electric Tow Tractor When Transporting

The tractor must be fixed correctly on the pallet or somewhere else when transporting with trucks or tractors. Otherwise, the truck must apply fixing ring.

When fixing tractor, get tension belt (2) round above the tractor and fix it on fixing device (3). If not equipped with coupling device, ring bolt can be used.

Tight en the tension belt with clamping device.

Take effective measures on particular cases, ensuring the validity and security of measuring and handling operation.

c.First Trial Run

 The tractor can only use accumulator as power supply. Changing to use AC power will damage the electric circuit.

To ensure the tractor work normally after delivery and transportation, the following operations have to be completed:

- Check the completeness of equipments, and if they are in normal state.
- If necessary, install batteries without damaging the connection cable.
- Recharge the accumulator immediately.
- Put the tractor into use according to the provision.

If the tractor has been parked for a long time, the connecting part between the wheels and ground will planish slightly. After driving for a short distance, the planished part will recover automatically.

3.Maintenance, Recharging and Replacement of the Accumulator

a.Safety Procedures for Lead-acid Accumulator Operation

Bef ore operating the accumulator, park the tractor according to the regulations.

Maintenance technician: The charging, maintenance and change should only be performed by special trained personnel. During the operation, this operation instruction and related provisions of accumulator and battery charging station manufacturers must be strictly followed.

Fire prevention: No smoking or open flame around the accumulator. Never put inflammable and operation equipments that might produce sparkles around at least 2m away from the tractor needs to be charged. The workplace must be well-ventilated. Prepare fire fight equipment.

Maintenance of the accumulator: The accumulator cover should keep dry and clean. The terminal and cable terminal lug must keep tight and clean, adding a little specialized grease. If the electrode of the accumulator handles without insulating, the aunti-skid insulating pad must be put onto the electrode.

Waste accumulator handling: Environmental protection provision of host country or current regulations on waste handling must be strictly followed when handling waste accumulator. During the handling, operate strictly according to manufacturer's instruction.

- ☞ The accumulator contains corrosive and poisonous acid liquor .Wearing certain labour protection products before doing any operation to the accumulator. Avoid direct connect to the accumulator acid liquor.
If the accumulator accidentally touches the clothes, skin or enters into eyes, you must use plenty of water to wash connected areas immediately and do medical examination in time. Neutralize the spilled accumulator acid liquor promptly.
- . The weight and dimension of accumulator have a large impact on the safety of tractor operation. The accumulator equipment charging must secure the agreement of our company.

a.Accumulator Type

When delivery, the equipped accumulator types of tractor are as follows:

Two Types: 12V 85Ah, Diemnsion (262x168x226mm)

The accumulator weight is marked on the accumulator nameplate.

 When changing or assembling the accumulator, pay attention to the fixed position of accumulator in the accumulator covers of the tractor.

a.Accumulator Charging

Park the tractor in well-ventilated indoors when charging.

Don't open the charger. Once it gets damaged, change it immediately.

Grid interface

Power voltage: 230V (+10/-15%)

Power frequency: 50Hz/ 60Hz

- Power cable can be connected from the outside.
- Plug the vattery plug in the socket.

The charger indicator light flashes green (or yellow) shows the charger has already connected to the power.

- Charge the accumulator until the charger indicator light shows green continuously. The accumulator is full-charged. The charger changes to microflow charging automatically. The microflow charging lasts until pulls the plug out from the power socket.
- Once the plug connects to the power, all electric functions of the tractor are interrupted entirely. The tractor will not able to do any work.

According to the discharging condition, the charging time can last for 11 hours.

Charge partly

The charger is designed to automatic adjustment type and continues to charge the charged parts of the accumulator. The abradability of the accumulator is low.

The charger indicator light flashes red shows the accumulator is damaged or the charging circuit is broken off.

4.Operation Instruction

a.Safety Procedures for Using Electric Tow Tractor

Driving permission: The electric tow tractor should only be operated by personnel trained in operating the tractor, who can pass the equipment user's test, master the skills of equipment operation and load handling and officially get the appointment of equipment user or its client.

The right,duty and responsibility of driver: Clear with his own right and duty, the driver should be trained in operating the tractor and also knows the contents in this operation manual very well.The user must grant the operator due rights.

If the operator needs to walk with the tractor, the operator should wear safety boots during operation.

Unauthorized persons are prohibited to use : The driver is responsible for managing the electric tow tractor in use, and must prevent any unauthorized person from driving or operating the tractor. Never carry persons with the tractor.

Damage and defects of the equipment: In case damages or other defects occur with the tractor and its accessories, the driver should inform the supervisor immediately. If the operating performance of the tractor is not perfect (e.g. with worn wheels or brake malfunction), always stop using it until repaired completely.

Equipment maintenance: The driver can not maintain or make any changes to the tractor if not trained or permitted. The driver should not outage or adjust safety devices and switches.

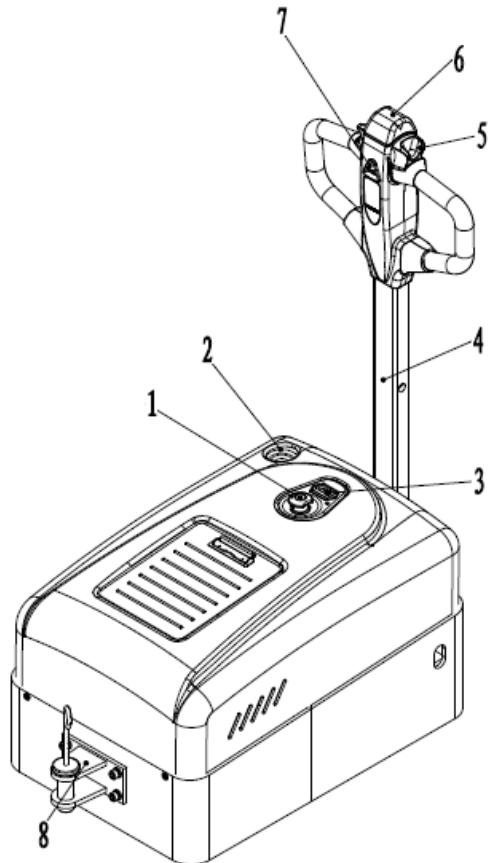

Dangerous area: Dangerous area generally refers to these locations, in which the tractor、its lifting mechanism and the driving of loading goods is dangerous to persons in this area.The scope of this area also extends to dangerous locations where the loads are lowered or the trailer is separated.

Unauthorized persons must be ordered to leave dangerous areas. Warning signs must be hung in this area. If the warned persons still stay in dangerous area, the driver should stop the tractor immediately.

Safety device and warning label: Strictly follow all provisions on safety devices, warning signs and precautions described in this manual.

b. Instruction for Operation and Display Elements

No.	Operation elements	Function
1 E	Emergency switch	Circuit interruption. All electric function stops, and the tractor is forced to brake. Pull the upper cover out can assure the tractor will not start accidentally
2	Charging plug, charging socket	Use for accumulator charging
3 D	Display elements	Show accumulator capacity
4 Cont	Control handle lever	Control the tractor and its steering
5 D	Driving accelerator	Control driving direction and speed
6 P	Protection button (belly switch)	Safe function. When start using this function, the tractor can be forced to drive backward in about 3 seconds.
7 "	"Warning"button (Horn button)	Give out warning signal
8 Coupling	device	Use for trailer loading (belongs to attachment)

c.Put Electric Tow Tractor into Use

Before driving the tractor, the driver must inspect and ensure that no other personnels stay in dangerous area.

Electric driving control system can monitor all its functions automatically. It can self-interrupt driving and steering operation when malfunction occurs.

Please connect our customer service department to maintain when malfunction occurs.

Inspection and operation must be executed before putting the tractor into daily use

- Inspect the tractor completely, especially pay attention to whether the wheels are damaged or not.

Start the tractor

- Install the upper cover of the main switch (1), and then rotate outward to pull it out.
- Check the function of the alertor (7).
- Check the function of the driving regulator (5).

The tractor enters into operating preparation status.

Display elements (3) shows the current electric quantity of the accumulator.

d.Operation of the Electric Tow Tractor

a) Safety system of driving operation

Driving route and working area: Only drive the tractor on prescribed route. Unauthorized personnels must keep far away from the working area. Only put goods on assigned positions.

Precautions during driving: The driver must control driving speed according to local conditions. Always drive in low speed when passing curved passageways, narrow passageways, rotary doors or any view-blocking places. The driver must keep enough braking distance from vehicles ahead and constantly control the tractor. It is prohibited to make an abrupt stop (unless in emergency), rapid U-turn or overtaking in dangerous or view-blocking places.

Drive the tractor onto the lift or loading platform: If the load capacity of the lift or platform is sufficient and the design is suitable to bear the tractor, they can be used for transportation with the permission from equipment user. Check according to the requirements before operation. When entering the lift, the loads must enter ahead. And locate the tractor in a suitable position to prevent from contacting walls around. If personnels take the lift together with the tractor, they have to enter after the tractor enters and stops firmly, and leave before the tractor reaches presetting height.

Tractor trailer: When towing the trailer without/with braker by the tractor, do not exceed the stipulated maximum trailer loading limit. The goods on the trailer must fit as stipulated with dimension not exceeding the allowable size parameter of roadways. After connecting to the trailer, the driver must check the coupling device of the trailer for strong installment before starting the tractor. When driving the front tractor, make sure that the trailer can finish driving and braking safely and smoothly in any cases.

b) Driving、steering、braking

Pay special attention to accidental conditions of the tractor frame when driving and steering.

Pull the control handle left or right and make the tractor steer; the handle and the tractor are closely connected, the tractor makes the driving wheel rotate by the handle, and the tractor follows the movement of the handle.

Emergency stop

- Press the main switch (1).
All electric function will be interrupted.

Driving

Before driving the tractor, make sure all covers of the tractor are closed and locked.

- Put the tractor into use.
- Put the control handle on the desired driving direction, forward or backward, etc.

The tractor will drive in the chosen direction.

The driver adjusts driving speed with driving regulator.

Emergency stop

Release the control handle will brake compulsively, the handle will enter the upper braking range automatically.

If the handle moves slowly when entering braking position, reasons must be found and troubles be removed. Change the return spring if necessary.

Braking

The braking performance of the tractor depends largely on the ground condition. The driver must clear about this point while driving.

The driver must drive with care. The driver should also brake appropriately to avoid load movement or trailer disjunction when dangerous situations are not occur.

Two braking methods are available:

- Use regenerative brake (rolling-stoop brake)
- Use reverse brake (drive regulator)

Use regenerative brake:

When the travel regulator is released, it turns to position "0".

According to the setting, the tractor will perform regenerative brake by rolling-stop braker.

Use reverse brake

Turn travel regulator to reversed direction during driving.

The tractor will brake by reverse current until it travels in opposite direction.

The braking effect relates to the position of travel regulator.

c) Park the tractor acc. to the provision

If the driver has to leave the tractor, even for a short time, park the tractor first acc. to the provision.

Never park the tractor on the slope.

- Press the main switch (emergency stop) to position "off", and then pull the upper cover of main switch out.

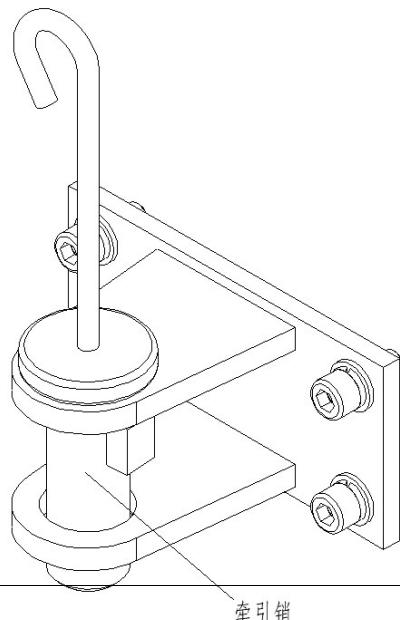

d) Coupling device

When connecting or perform hook operation between the tractor and the trailer, make sure both are in the ground with equal height. All [operation] elements must in position "0". The tractor and the trailer must be fixed securely to prevent casual movement.

Watch for jamming! Do not put fingers between two trucks when connecting the trailer.

Connect the trailer

- Pull the traction pin entirely out of the coupling device (rotate the traction pin to a certain angle to make the block point to the notch on the plate).
- Move the tractor towing ring to its traction device, and insert the traction pin from the top into the traction pin hole and across the towing ring of the trailer.
- Safety device: After inserting the traction pin, rotate the traction in to a certain angle to make the block stagger notch position. Avoid the traction pin falling down when it's very bumpy.

Trailer unhooking

- Check and ensure the trailer for movement.
- Rotate the traction pin to a certain angle to make the block point to the notch on the plate, pull the traction pin out of the coupling device, and then draw the trailer towing ring out from the side. In the end, insert the tractor pin into coupling device again and rotate a certain angle to fix.

e) Driving with trailer

In special, tough working environment (e.g.: smooth ground, slideway), pay attention that the trailer must reduce weight to ensure safe braking when accidents occur. The given allowable maximum loading value just applies to tractors driving on flat surface (loadable and skidproof ground).

Pull the tractor only

When starting the tractor, make sure the safety of brak system and tractor steering.

Pay attention that the view will be narrow when the tractor is long and performs steering operation.

1. Slow drive until the tractor coupling is tightened. Be careful when accelerating.
2. When towing the trailer, slow down or park the trailer, reduce the speed gradually. Brake safely.

It is hard to move the trailer. Pay attention to the angle when steering.

e.Malfunction assistance

This chapter can help users to confirm and eliminate simple malfunctions or problems raised by wrong operation. Please check according to the operation order of the following table and confirm specific reasons to the malfunctions.

Malfunction P	Possible reasons	Solutions
The tracor can't drive.	<ul style="list-style-type: none"> - Pressed the main switch (emergency stop) . - The accumulator capacity is low. - The safety device is damaged. 	<ul style="list-style-type: none"> - Release the main switch. - Check the charging condition of the accumulator, charge if necessary. - Check the safety device.

If the problems still can not be solved after executing the above operating steps listed in the “solutions”, please contact the after-sales service department of our company and operations on further search and troubleshooting must be carried out by specially trained after-service personels.

5 .Maintenance and Sevice of the Electric Tow Tractor

a.Operation Security and Environmental Protection

The check and maintenance work described in this chapter should be executed according to the time intervals in the maintenance list.

Never modify any parts, especially safety devices of the tractor. Never change the operation speeds of the tractor.

Only spare parts provided by original manufacturer meet our company's quality management requirement. Never change the operation speeds of the tractor.

Only spare parts provided by original manufacturer meet our company's quality management requirement. Only use spare parts from the manufacturer for the guarantee of the safety and reliability of equipment operation performance. The replaced material including liquid medium should be collected and disposed of according to current local environment protection. Please contact our customer service department if you need to change oil.

b.Safety Procedures for Maintenance and Sevice

Maintenance technician: The maintenance and service of the tractor should only be performed by special personnel trained by the manufacturer. Our service department owns technicians charging field service. These special trained technicians are qualified to maintenance works of equipment. We strongly recommend users to sign maintenance contracts with our service centers.

Lifting and jacking equipments: When the tractor needs to be raised up, the lifting device must be strictly installed on the fixed position.

When the truck is raised up, proper measures such as using wedges and wooden blocks must be applied to prevent the tractor from accidentally sliding down or tilting over.

Cleaning operation: Flammable liquid can not be used for cleaning the truck. Before cleaning, take safety precautions to prevent electric sparks (e.g. sparks caused by short circuit). Use soft air suction or compressed air, non-conductive and anti-static brushes to clean electric and electronic components.

If you are going to use water spray or high pressure cleaner to clean the tractor, all electric and electronic components must be covered carefully in advance, since moisture may cause them malfunction.

Never use steam nozzles cleaning equipment.

Operation of Electric System: Operation on the electric system should only be performed by specially trained personnel. Before operation, operators must take all necessary precautions to prevent electric accidents. If the tractor is powered by the accumulator, accumulator plug on it should be pulled out to remove the voltage of the tractor.

Welding Operation: To prevent electric components from being accidentally damaged, remove these electric components on the tractor before welding.

Set value: When maintenance and change electric or electronic components, make sure obey to the specified parameter related to the tractor.

Tractor tyres: Quality of the tyres has significant effect on stability and driving performance of the tractor. If needed to replace the tyres assembled during delivery, original spare parts provided by the manufacturer must be applied to satisfy data index on the type list. When replacing wheels or tyres, ensure that the tractor is levelled as delivery state (wheels must be replaced in pairs, i.e. replace right wheel together with left one).

c.Maintenance and Check

Perform overall professional maintenance is one of the important preconditions to ensure safe and reliable operation of the tractor. Failure in performing regular maintenance may cause malfunction of the tractor and potential risk to personnels and operation safety.

Maintenance intervals specified in maintenance checklist only apply to single shift a day under normal operation conditions. If the strength of working condition is higher than general level, such as in dusty environment, the ambient temperature varies remarkably or in multi-shift situation, the maintenance period has to be shortened.

The maintenance checklist on the next page lists each specific maintenance operation and the time of performing operation. Maintenance intervals are as follows:

W = Every 50 work hours, but at least once a week.

A = Every 500 work hours, but at least once every six months

B = Every 1000 work hours, but at least once every 12 months

C = Every 2000 work hours, but at least once every 12 months

The equipment user are responsible for performing operations when the maintenance interval is W.

When the tractor is in running-in stage (after working about 100 hours), the equipment user should check the fixation of nuts and bolts, retighten if necessary.

Maintenance checklist

			Time interval of maintenance			
		Standard	W	A	B	C
Chassis & Main frame	1.1	Check all supporting parts for damages			●	
	1.2	Check all bolt connections			●	
Driving device	2.1	Check the transmission for abnormal voice or leakage			●	
Wheels	3.1	Check for wear and tear	●			
	3.2	Check supporting and fixing conditions		●		
Steering system	4.1	Check the mechanical parts of steering system and lubricate if necessary			●	
Electric system	5.1 C	Check performance			●	
	5.2	Check cables for damage and terminals for tight and secure			●	
	5.3	Check if the parameter of safety device is correct			●	
	5.4	Check if the switch installment is secure and functions are proper			●	
	5.5	Check the function of warning device and safety switch device.			●	
Motor	6.1	Check the fixing condition of the motor			●	
Accumulator	7.1	Check if the terminal is secure and then grease			●	
	4.2	Clean the joint of accumulator plug and check if the plug is tightened			●	
	7.4	Check the cable for damages, replace if necessary			●	
Lubrication operation	8.1	Grease the tractor according to lubrication schematic diagram			●	
General Test	8.1	Check the ground connection of electric system			●	
	8.2	Check the travelling speed and braking distance			●	
	8.4	Check the safety device and short-circuit protection devices			●	
Trial run test	9.1	Perform trial run under with rated load			●	
	9.2	The tractor needs to be tested by an acceptance personnel after completion of above maintenance			●	

c-1.Liquid Medium

The use and dispose of liquid medium: The use and dispose of liquid medium must perform standard operation in strict accordance with rules made by the manufacturer.

Unstandarded operation would be harmful to the healthy of operator and ambient environment. Only store the liquid medium in specified container. The liquid medium may be flammable, keep far away from high temperature or open fire.

Use clean container when adding the liquid medium. Prohibit mixing different kinds of liquid medium together, except for explicite provisions of mixture operation specified in operation instruction.

Avoid liquid splashing. If the liquid medium splashes, use adequate adsorbent to cover on the surface of the medium immediately and dispose the mixture of liquid and adsorbent according to the provision.

d.Outage and Storage of the Electric Tow Tractor

If the tractor has been in storage for more than two monthes, park it in a dry and antifreezing place. Certain operation shall be performed before, during and after storage.

During storing, the tractor must be put up by the support and all the wheels off the ground to prevent the wheels and the bearing within wheels from being damaged.

If the storage time is over six monthes, please contact our service department on additional protection measures.

d-1.Precautions before Storage

- Clean the tractor thoroughly.
- Apply a thin layer of lubricant oil or grease onto all mechanical parts without surface painting process.
- Charge the accumulator.
- Disconnect the terminal on the accumulator and clean the accumulator. Apply special grease on electrode bolt.

Please follow the related operation instructions and provisions specified by accumulator manufacturer at the same time.

- Sparge appropriate contact spray onto all exposed contact surface.

d-2.Precautions during Storage

Every 2 monthes

- Charge the accumulator

If the tractor has accumulator driving:

It is important to recharge the accumulator periodically. Otherwise, after the accumulator self discharges to a certain degree will result in insufficient loss of capacity and the accumulator may vulcanize and then scrap thoroughly.

a.Equipment Abandonment and Waste Disposal Method

The final abandonment and waste disposal of the tractor must follow the existing laws and regulations of user countries. Pay special attention to provisions on waste accumulator disposal、oil and fuel、electronic and electrical equipments.

6.DECLARATION OF CONFORMITY (valid, if sold within the EU)

CE-DD-002

[GB] CE Declaration of Conformity

The signatory hereby declares that the specified machine conforms to the EU Directive 2006/42/EC (Machine Directive) and 2004/108/EEC (Electro-Magnetic Compatibility, EMC) including their amendments as translated into national legislation of the member countries. The signatory is individually authorized to compile the technical documents.

[DE] EG-KONFORMITÄTSERKLÄRUNG

Der Unterzeichner bescheinigt hiermit, dass die im Einzelnen bezeichnete Maschine den Europäischen Richtlinien 2006/42/EG (Maschinenrichtlinie) und 2004/108/EWG (Elektromagnetische Verträglichkeit - EMV) einschließlich deren Änderungen sowie dem entsprechenden Rechtserlass zur Umsetzung der Richtlinien in nationales Recht entspricht. Der Unterzeichner ist bevollmächtigt, die technischen Unterlagen zusammenzustellen.

[ES] DECLARACIÓN DE CONFORMIDAD CE

El signatario certifica por medio de la presente que la máquina especificada cumple con las Normas Europeas 2006/42/CE (Normativa para maquinaria) y 2004/108/CE (Compatibilidad electromagnética), incluyendo sus respectivas modificaciones, así como con el decreto-ley para la adaptación de las normas al derecho nacional. El signatario dispone de una autorización individual que le permite compilar la documentación técnica.

[FR] DECLARATION DE CONFORMITE CE

Par la présente déclaration, les soussignés certifient que le machines spécifié ci-dessus est conforme à la loi et aux directives européennes 2006/42/CE (directive sur les machines) et 2004/108/CEE (compatibilité électromagnétique - CEM), y compris aux modifications qui y sont apportées et à l'arrêté autorisant sa transposition en droit national. Chaque signataire est habilité à établir individuellement la documentation technique.

[NL] EG-CONFORMITEITSVERKLARING

Ondergetekenden verklaren hierbij dat - volgens de nationale wetgeving van de Lidstaten - de hierboven vermelde opgegeven machina beantwoordt aan de bepalingen qua veiligheid bij machines (EG richtlijn 2006/42/EC) en electro-magnetische compatibiliteit (EG richtlijn 2004/108/EEC). Ondergetekenden zijn ieder individueel gemachtigd het technisch dossier samen te stellen.

[PT] DECLARAÇÃO DE CONFORMIDADE CE

Pela presente, os signatários certificam que o máquina especificado está conforme às Directivas Europeias 2006/42/CE („Máquinas“) e 2004/108/CEE (Inocuidade Electromagnética - IEM), incluindo as alterações das mesmas e o respetivo decreto-lei para a transpoção em lei nacional. Cada um dos signatários está autorizado a proceder à elaboração da documentação técnica.

[IT] DICHIARAZIONE DI CONFORMITÀ CE

I sottoscritti dichiarano che il veicolo per trasporti interni a macchina specificato soddisfa le Direttive Europee 2006/42/EC (Direttiva Macchine) e 2004/108/EEC (Compatibilità elettromagnetica - EMV) comprese le relative modifiche, come pure il rispettivo decreto legislativo per la conversione delle direttive in diritto nazionale. I sottoscritti sono singolarmente autorizzati alla creazione della documentazione tecnica.

[BG] ЕВРОПЕЙСКА ОБЩНОСТ - ДЕКЛАРАЦИЯ ЗА СЪОТВЕТСТВИЕ

Подписаните удостоверяват с настоящето, че подробно описаното машина средство отговаря на европейския норматив 2006/42/EG (норматив за машини) и на 2004/108/EG (електро-магнетична съвместимост), включително с техните промени, както и на съответния указ за прилагане на нормативите в националното право. Подписаните при това са упълномощени поотделно да съставят техническата документация.

[CZ] EG - PROHLÁŠENÍ O SHODE

Níže podepsaný tímto potvrzuje, že podrobný popis uvedené stroje odpovídá Evropským směrnicím 2006/42/EC (směrnice pro stroje) a 2004/108/EEC (elektromagnetická interference - EMV) včetně jejich pozdějších úprav, jakož i příslušným právním výnosům pro uplatnění příslušné směrnice v rámci národního práva. Každý z podepsaných jsou jednotlivě zplnomocněni k vytvoření technických podkladů.

[DK] EF-OVERENSSTEMMELSESERKLÆRING

Undertegnede attesterer hermed, at det specificerede maskine stemmer overens med de Europæiske Direktiver 2006/42/EU (maskindirektiv) og 2004/108/EØF (elektromagnetisk kompatibilitet - EMC) samt med den modsvarende lovvæddagelse til implementering af direktiver i den nationale lovgivning. De undertegnede er hver for sig befojet til at sammenstille de tekniske dokumenter.

[EST] EL vastavusavaldis

Allakirjutanud töendavad käesolevaga, et üksikasjaliselt kirjeldatud täpsustatud masin vastab Euroopa direktiivide 2006/42/EÜ (Direktiiv masinate kohta) ja 2004/108/EMÜ (Elektromagnetiline sobivus - EMS) kaasa arvatud nende muudatused ja nendele vastavatele õigusmäärustele direktiivide muutmiseks siseriiklikuks õiguseks. Igas allakirjutanu üksikult on volitatud koostama tehnilist dokumentatsiooni.

[FIN] EU-YHDENMUKAISUUSSELOSTUS

Allekirjoittaneet todistavat täten, että kukin erikseen mainittu omalla voimanlähellä varustettu tehdaskone vastaa EU-direktiivien 2006/42/EC (koneenrakennusdirektiivi) ja 2004/108/EEC (sähkömagneettinen yhteensopivuus – EMC) määräyksiä sekä niiden muutoksia ja niiden kansalliseen lainsäädäntöön soveltamista koskevaa oikeussääntöä. Jokaisella allekirjoittaneesta on oikeus itsenäisesti laata asiaankuuluvia teknisiä asiakirjoja.

[GR] ΔΗΛΩΣΗ ΣΥΜΜΟΡΦΩΣΗΣ ΕΟΚ

Οι υπογράφοντες βεβαίωνουν διά της παρούσης ότι το συγκεκριμένο μηχάνημα συμμορφώνεται προς την Κοινοτική Οδηγία 2006/42/EK («Μηχανήματα») και 2004/108/EOK (Ηλεκτρομαγνητικής Συμβατότητας, ΗΜΣ), καθώς και οι τροποποιήσεις τους, όπως μεταφράστηκε στην εθνική νομοθεσία των χωρών μελών. Οι υπογράφοντες είναι σε κάθε περίπτωση εξουσιοδοτημένοι απομικά να καταρτίσουν τα τεχνικά έγγραφα.

[HU] EU KONFORMITÁSI NYILATKOZAT

Alulírottak ezennel igazolják, hogy a részletesen leírt a megadott gép megfelel a 2006/42/EC (Gép-Irányelv) és a 2004/108/EEC (Elektromágneses összeférhetőség - EMV) Európai Irányelvöknek, beleértve azok módosításait, valamint az irányelv nemzeti jogba történő általánosítására vonatkozó jogi rendelkezést. Továbbá az alulírottak mindegyike rendelkezik meghatalmazással arra nézve, hogy összeállíthasson műszaki dokumentációt.

[LT] ES atitikimo deklaracija

Žemėlau pasirašę asmenys patvirtina, kad atskirai aprašytas nurodyta mašina atitinka Europos Sąjungos direktyvas 2006/42/EB (Mašinų direktyva) ir 2004/108/EEB (Elektromagnetinių suderinamumų – EMS) įskaitant jų pakeitimus, o taip pat ir atitinkamą teisės aktą dėl direktyvų igyvendinimo nacionalinėje teisėje. Kiekvienas iš pasirašiusių asmenų turi teisę ruošti techninę dokumentaciją.

[LV] ES atbilstības deklarācija

Ar zemāk redzamajiem parakstiem tiek apliecināts, ka norādīta mašīna atbilst Eiropas Savienības normatīvām 2006/42/EG (Mašīnu normatīvas) un 2004/108/EWG (Elektromagnētiskā atbilstība – EMV), ieskaitot to izmaiņas, kā arī atbilstošos tiesiskos rīkojumus normatīvu pielāgošanai nacionālajai likumdošanai. Parakstu īpašnieki ir atsevišķi pilnvaroti sastādīt tehniskās dokumentācijas.

[IN] EU-KONFORMITETSERKLÄRING

Undertegnede bekrefter hermed at de enkelte betegnede maskin med kraftdrift tilsvarer de europeiske retningslinjene 2006/42/EC (maskinretningslinje) og

2004/108/EEC (elektromagnetisk fordraglighet - EMV) inklusiv disses endringer og den tilsvarende rettsforordning til omsetning av nasjonal rett. Hver undertegnede er fullmekting til å sette sammen de tekniske dokumentene.

[PL] DEKLARACJA ZGODNOŚCI WE

Niżej podpisani deklarują, że poniżej opisana maszyna spełnia wymagania określone w dyrektywach Europejskich 2006/42/EC (Dyrektwa Maszynowa) i 2004/108/EEC (Kompatybilność elektromagnetycznej - EMC) wraz z ich późniejszymi zmianami oraz odpowiednimi rozporządzeniami mającymi na celu przeniesienie tych dyrektyw do prawa krajów członkowskich. Sygnatariusz jest indywidualnie upoważniony do zestawiania dokumentacji technicznej.

[RO] DECLARATIE DE CONFORMITATE CE

Subsemnatii adeveresc prin prezenta că vehiculul de specificat mașină descriș individual corespunde directivelor europene 2006/42/CE (Directiva privind mașinile) și 2004/108/CEE (Compatibilitatea electromagnetică - CEM) inclusiv modificărilor lor precum și actului legislativ corespunzător prezentului transpunerea directivelor în drept național. Subsemnatii sunt fiecare în parte împuñăriți să întocmească documentația tehnică.

[RUS] Декларация соответствия стандартам ЕС

Настоящим лица, подписавшие документ, удостоверяют, что машина с указанной спецификацией соответствует европейским стандартам 2006/42/EG (Транспортная директива) и 2004/108/EWG (Электромагнитная совместимость - EMC), включая изменения в них, а также соответствующим национальным стандартам и нормам. Каждое по отдельности лицо, подписавшее документ, имеет полномочия для составления технической документации.

[SK] EG-KONFORMITETSFÖRKLARING

Undertecknarna intygar härmed att det i detalj betecknade maskin uppfyller de Europeiska direktiven 2006/42/EG (Maskindirektiv) och 2004/108/EEG (Elektromagnetisk tålighet - EMV), inklusive ändringarna i detta och den motsvarande rättsförordningen för att omsätta direktiven i nationell rätt. Undertecknarna har var för sig fullmakt att sammanställa den tekniska dokumentationen.

[SLO] VYHLÁSENIE O ZHODE

Dolu podpísaní túmto potvrdzujeme, že podrobny popis uvedené stroje Zodpovedá Európskym smerniciam 2006/42/EC (ernica pre stroje) a 2004/108/EWG (elektromagnetická tolerancia – EMV) vrátane jeho neskorších úprav, rovnako zodpovedá aj príslušným právnym nariadeniam na uplatnenie smerníc v rámci národného práva. Každý z podpísaných je jednotlivo splnomocnený na vytvorenie technických podkladov.

[SLO] EU IZJAVA O SKLADNOSTI

Podpísaní s tem potrijuvemo, da posamečno označeno določeno stroj vozilo odgovarja Evropski direktivi 2006/42/EC (Direktiva o strojih) in 2004/108/EEC (Elektromagnetna skladnost - EMV) vključno z njihovimi spremembami ter ustrezno pravno uredbo o prevzemu smernic v nacionalno pravo. Podpismiki so vsakokrat posamezno pooblaščeni za izdajanje tehnične dokumentacije.

[TR] AB Uygunluk Açıklaması

İmza sahibi şahıslar, ayrıntıları belirtilen makine aracının, 2006/42/EC (Makine Yönergesi) ve 2004/108/EEC (Elektromanyetik Uyumluluk – EMC) no'lu Avrupa Yönergelerine ve bunların değişiklik sonucu oluşan metinlerine ve yönergelerin milli hukuk hükümlerine dönüştürülmesine dair ilgili hukuk kararnamesine uygun olduğunu tasdik ederler. İmza sahibi şahıslar teknik dosyaları bir araya getirmek için münferiden vekil tayin edildi.
